# RomRadius™

Embedded RADIUS Client Toolkit

RomRadius Benefits

- Embedded RADIUS Client (RFC 2865)
- Support for multiple RADIUS servers
- PAP (RFC 1334), CHAP (RFC 1994), MS-CHAP (RFC 2548) and MS-CHAPv2 (RFC 2759) authentication
- Standalone or integrated with RomPager product family
- Small RAM/ROM footprint
- ANSI-C Implementation
- Highly portable across processor, OS and TCP/IP stack

Allegro's RomRadius product offers embedded RADIUS client authentication capabilities that are RFC compliant to be built into your embedded device.

RomRadius

The RomRadius client toolkit is designed to be utilized in a wide range of embedded applications. Multiple Radius servers are supported along with PAP, CHAP, MS-CHAP and MS-CHAPv2 authentication. Used standalone or tightly integrated with the RomPager family of products, RomRadius offers your embedded design flexibility and functionality for authentication.
